Category:Antidiarrhoeals 2a6bf3887c 1,3-Benzodioxolylbutanamine 2a6bf3887c "Cannabis afghanica" 2a6bf3887c Category:Alpha-adrenergic agonists 2a6bf3887c 1,4,6-Androstatriene-3,17-dione 2a6bf3887c 1-Androsterone 2a6bf3887c Category:Antibiotics 2a6bf3887c Category:Anesthetics 2a6bf3887c 1-Benzyl-4-(2-(diphenylmethoxy)ethyl)piperidine 2a6bf3887c Category:Antidementia agents 2a6bf3887c 1-(3-Chlorophenyl)-4-(2-phenylethyl)piperazine 2a6bf3887c The list is divided into core items and complementary items. The core items are deemed to be the most cost-effective options for key health problems and are usable with little additional health care resources. The complementary items either require additional infrastructure such as specially trained health care providers or diagnostic equipment or have a lower benefit-cost ratio. About 25% of items are in the complementary list. Some medications are listed as both core and complementary. While most medications on the list are available as generic products, being under patent does not prevent inclusion. 2a6bf3887c 1,2-Dichloropropane 2a6bf3887c Category:ATC codes 2a6bf3887c 1-(2-Dimethylaminoethyl)dihydropyrano(3,2-e)indole 2a6bf3887c Category:ACE inhibitors 2a6bf3887c 1,4-Butanediol 2a6bf3887c Category:Antiinfective agent stubs 2a6bf3887c 1,6-Hexanediol 2a6bf3887c (C6)-CP 47,497 2a6bf3887c 1-Androstenediol 2a6bf3887c Category:Antibiotic stubs 2a6bf3887c (-)-2 $\beta$ -Carbomethoxy-3 $\beta$ -phenyltropane 2a6bf3887c Category:Alkyl nitrites 2a6bf3887c (R)-3-Nitrobiphenylene 2a6bf3887c Category:Anticholinesterases 2a6bf3887c Category:Antiasthmatic drugs 2a6bf3887c

Acne Veterinary Dermatology Acne, also known as acne vulgaris, is a long-term skin condition that occurs when dead skin cells and sebum clog hair follicles. It primarily affects skin with a relatively high number of oil glands, including the face, upper part of the chest, and back. The resulting appearance can lead to lack of confidence, anxiety, reduced self-esteem, and, in extreme cases, depression or thoughts of suicide. Scott KV (September 1997). Typical features of the condition include blackheads or whiteheads, pimples, oily skin, and possible scarring. "Feline acne and results of treatment with mupirocin in an open clinical trial: 25 cases (1994-96)" 2a6bf3887c

 2a6bf3887c Susceptibility to acne is primarily genetic in 80% of cases. The roles of diet and cigarette  
 smoking in the condition are unclear, and neither cleanliness nor exposure to sunlight are associated with  
 acne. In both sexes, hormones called androgens appear to be part of the underlying mechanism, by causing  
 increased production of sebum. Another common factor is the excessive growth of the bacterium  
 Cutibacterium acnes, which is present on the skin. 2a6bf3887c 1-Aminomethyl-5-methoxyindane 2a6bf3887c
