In the Latin names for plants created by Linnaeus, the word officinalis indicates that a plant was used in this way. For example, the marsh mallow has the classification *Althaea officinalis*, as it was traditionally used as an emollient to soothe ulcers. Pharmacognosy is the study of plant sources of phytochemicals. 5c5d9777ed 3D printing 5c5d9777ed 0 5c5d9777ed Cucurbita 5c5d9777ed 3dfx Interactive 5c5d9777ed Saffron 5c5d9777ed

Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself. You can use the list to generate your own lists in whatever language you're learning and to test yourself 5c5d9777ed
