Foot (unit) "ft";. Since an international agreement in 1959, the foot is defined as equal to exactly 0. 3048 meters. The prime symbol, ', is commonly used to represent the foot. However, the singular form may be used like a plural when it is preceded by a number, as in "that man is six foot tall". The most common plural of foot is feet. In some cases, the foot is denoted by a prime, often approximated by an apostrophe, and the inch by a double prime; for example, 2 feet 4 inches The foot (standard symbol: ft) is a unit of length in the British imperial and United States customary systems of measurement. In both customary and imperial units, one foot comprises 12 inches, and one yard comprises three feet. Footage is the term used informally for a length expressed in feet 48811326fd

Standards for the exact length of an inch have varied in the past, but since the adoption of the international yard during the 1950s and 1960s the inch has been based on the metric system and defined as exactly 25.4 mm. 48811326fd With a transverse engine and gearbox in a mid-mounted, rear-wheel drive configuration, the X1/9 was noted for its balanced handling, retractable headlights, lightweight removable hardtop which could be stowed under the bonnet, front and rear storage compartments — and for being the first Fiat to have been designed from its conception to meet US safety regulations. 48811326fd

9-track tape The 1/2 inch (12.7 mm) wide magnetic tape media and 9-track tape is a format for magnetic-tape data storage, introduced with the IBM System/360 in 1964. 7 mm) wide magnetic tape media and reels have the same size as the earlier IBM 7-track format it replaced, but the new format has eight data tracks and one parity track for a total of nine parallel tracks. Various recording methods have been employed during its lifetime as tape speed and data density increased, including PE (phase encoding), GCR (group-coded recording), and NRZI (non-return-to-zero, inverted, sometimes pronounced "nur-zee"). Data is stored as 8-bit characters, spanning the full width of the tape (including the parity bit). 9-track tape is a format for magnetic-tape data storage, introduced with the IBM System/360 in 1964. The cartridge was derived from an earlier round designed by Luger (7.65×21mm Parabellum), which itself was derived from a cartridge used in the Borchardt C-93 pistol (7.65×25mm Borchardt). Shortening the cartridge case used in the Borchardt pistol allowed... 48811326fd The album's recording also coincided with the start of big changes at 4AD. During this era, 4AD co-founder and president Ivo Watts-Russell made plans to sell the label back to Beggars Banquet, from which he had purchased sole interest back in 1981 (this deal was completed in early 1999); 4AD's distribution contract with Warner Bros. Records in the USA had come to an end; and Vaughan Oliver and his v23 design firm (whose distinctive covers had virtually defined the label's aesthetic... 48811326fd Versions of the FE line designed for use in medium and heavy trucks and school buses from 1964 through 1978 were known as "FT," for "Ford Truck," and differed primarily by having steel (instead of nodular iron) crankshafts, larger crank snouts, smaller ports and valves, different distributor shafts, different water pumps, and a greater use of iron for its parts. 48811326fd The cartridge's low velocity combined with the heavy, poorly streamlined bullet, gives the 9×57 a relatively poor trajectory, which makes it unsuited to shooting at longer ranges. This calibre was popular as a large-deer cartridge in Germany and Central Europe; and also in German spheres of influence in Africa in the early 20th century, such as German West Africa and German East Africa, where it was widely popular among European farmers and settlers for shooting plains game. It varied in length from country to country, from city to city, and sometimes from trade to trade. Its length was usually between 250 mm (9.8 in) and 335 mm (13.2 in) and was generally, but not always, subdivided into twelve inches or 16 digits. 48811326fd A 2007 US survey concluded that "about 60 percent of the firearms in use by police are 9mm [Parabellum]". It credited 9×19mm Parabellum pistol sales with making semi-automatic pistols more popular than revolvers. 48811326fd The United States is the only industrialized country that uses the (international) foot in preference to the meter in many but not all commercial, engineering, and standards activities. borrowing from Latin uncia ("one-twelfth; Roman inch; Roman ounce"). The vowel change from Latin /u/ to Old English /y/ (which became Modern English /ɪ/) is known as umlaut. The consonant change from the Latin /k/ (spelled c) to English /tʃ/ is palatalisation. Both were features of Old English phonology; see Phonological history of Old English § Palatalization and Germanic umlaut § I-mutation in Old English for more information. 48811326fd Firing a relatively heavy bullet of 14–16 g (220–250 grains) at a modest velocity of 670–700 m/s (2,200–2,300 ft/s), the 9×57mm is low in noise and recoil, pleasant to shoot, and regarded as accurate and effective on all but the very largest, most dangerous game at distances out to 250–300 m (300–350 yd). 48811326fd == Name == 48811326fd

Defever stated in an interview around the time of the album's release that he was trying to have less control, and focus more on being the main songwriter and guitarist. He even went so far as to work with an outside producer for the first time, recruiting Steve King, who had previously produced Aretha Franklin and George Clinton. 48811326fd The first units produced for a customer were built in December 1940 and January 1941 for the Atchison, Topeka and Santa Fe Railway and numbered the 100 set.
