The phrase "doctrine of the mean" occurs in Book VI, verse 29 of the Analects of Confucius, which states: b8245d7d3a Upon release, This Is What I Mean was met with widespread critical acclaim, with music critics praising Stormzy's "hard-hitting lyricism". The album debuted atop the UK Albums Chart, moving 27,800 album-equivalent units in its first week, marking the rapper's third consecutive chart-topping album, and was nominated for Album of the Year at the 2023 Brit Awards. The album was supported by two singles: "Hide & Seek" and "Firebabe", both of which peaked in the top ten of the UK Singles Chart. b8245d7d3a Luis Corradi b8245d7d3a The definition of MTBF depends on the definition of what is considered a failure. For complex, repairable systems, failures are considered to be those out of design conditions which place the system out of service and into a state for repair. Failures which occur that can be left or maintained in an unrepaired condition, and do not place the system out of service, are not considered failures under this definition. In addition, units that are taken down for routine scheduled maintenance or inventory control are not considered within the definition of failure. The higher the MTBF, the longer a system is likely to work before failing. b8245d7d3a

Mean time to recovery Examples of such devices range from self-resetting fuses (where the MTTR would be very short, probably seconds), to whole systems which have to be repaired or replaced. This does not mean the supplier is guaranteeing to have the system up and running again Mean time to recovery (MTTR), also known as mean time to repair or mean time to resolve, is the average time that a device or system will take to recover from any failure. system MTTR of which was 24 hours, than for one of, say, 7 days b8245d7d3a

Speroni b8245d7d3a The MTTR would usually be part of a maintenance contract, where the user would pay more for a system MTTR of which was 24 hours, than for one of, say, 7 days. This does not mean the supplier is guaranteeing to have the system up and running again within 24 hours (or 7 days) of being notified of the failure. It does mean the average repair time will tend towards 24 hours (or 7 days). A more useful maintenance contract measure is the maximum time to recovery which can be easily measured and the supplier held accountably. b8245d7d3a Javier Portales b8245d7d3a == Standard functionality == b8245d7d3a Alfredo Alcón b8245d7d3a
