

Side By Side Position

Conventions shifted in the early 1960s, at which point record companies started assigning the song they wanted radio stations to play to side A, as 45 rpm single records ("45s") dominated most markets in terms of cash sales in comparison to albums, which did not fare as well financially. Throughout the decade the industry would slowly shift to an album-driven paradigm for releasing new music; it was not until 1968 that the total production of albums on a unit basis finally surpassed that of singles in the United Kingdom. 5137932646 "Side to Side" peaked at number 4 on both the US Billboard Hot 100 and the UK Singles Chart, becoming her first top-five single from *Dangerous Woman* in the former and first top-ten single from the album in the latter. It also reached number 4 on the Canadian Hot 100, number 3 on the Australian chart and number 2 in the New Zealand chart. It is her second single to top the US Mainstream Top 40 airplay chart. The single has sold 1.1 million copies as of 2018 in the country, and has been certified sextuple platinum by the Recording Industry Association of America (RIAA) for additional equivalent units. 5137932646

Additionally, while White has offered the P34 gambit pawn for capture, Black has also offered their own P76 for capture as well making this a countergambit. Usually, Black accepts the side pawn gambit while White may or may not also capture Black's side pawn depending upon the variation. 5137932646

Side control From there the top combatant can proceed with elbows, knees, various submissions, or transition into a mounted position. In grappling, side control, often also called side mount or cross mount, is a dominant ground grappling position where the top combatant is lying perpendicularly over the face-up bottom combatant in such a way that the legs are free and they exert no control over the combatant on the bottom. It is high priority for the bottom combatant to sweep the top combatant or otherwise escape the position, for instance by entangling the opponent's free legs and trying to obtain the half guard or guard. The top combatant is referred to as having side control, and is in a stable position, with the other combatant pinned beneath them 5137932646

A drug or procedure usually used for a specific effect may be used specifically because of a beneficial side-effect; this is termed "off-label use" until such use is approved. For instance, X-rays have long been used as an imaging technique; the discovery of their oncolytic capability led to their use in radiotherapy for ablation of malignant tumours. 5137932646 == Side A (affirming) == 5137932646 == Kata-gatame == 5137932646 ==

Layout == 5137932646 The side pawns referred to are the pawns that are advanced in order to open both players' bishop diagonal. (P34 is White's side pawn, P76 is Black's.) In this opening, this pawn is captured by an opponent's rook in a gambit move - typically, made by Black with Rx34. This is one of the few gambits in shogi. The move has the typical characteristics of gambits: Black gains material with the extra pawn but now has lost tempo as their rook is now off its original file and requires a few moves to maneuver the rook back to the second file safely, White has lost material but now has faster development including the possibility of dropping a pawn to attack on the third file later (and Black has no comparable extra pawn drop possibilities). 5137932646
