Toy dog Types of dogs referred to as toy dogs may include spaniels, pinschers and terriers that have been bred down in size. King Charles Spaniel Chihuahueño, Chihuahua Chin, Japanese Chin Chinese Crested Dog Coton de Tuléar Epagneul Nain Continental, Continental Toy Spaniel Toy dog traditionally refers to a very small dog or a grouping of small breeds of dog. A toy dog may be of any of various dog types. Not all toy dogs are lap dogs

Other breeds that were said to have existed in the past were the African hairless dog (also known as the Abyssinian sand terrier, Egyptian hairless dog and African elephant dog, the last being a reference to its grey skin) and the Siamese Hairless Dog. Dog coat genetics == Dominant genes == In 2009 the Sonoma-Marín Fair trademarked the phrase World's Ugliest Dog. An anniversary book titled "World's Ugliest Dogs" was published in 2013, featuring text by the producer of the past seven years, Vicki DeArmon, and photos from World's Ugliest Dog Contests of years past. Chinese Crested Dog

Chinese Crested Dog Like most hairless dog breeds, the Chinese Crested Dog comes in two varieties, without hair and with The Chinese Crested Dog is a hairless breed of dog. Like most hairless dog breeds, the Chinese Crested Dog comes in two

varieties, without hair and with hair, which can be born in the same litter: the hairless and the powderpuff. The Chinese Crested Dog is a hairless breed of dog

History Extant breeds, varieties and types A number of early European accounts from Africa mention a small hairless dog. It was described as fast moving with a short, sharp bark, and it was said to be either sandy-coloured or blue-black. Contemporary reports indicated that it may or may not have had a crest of stiff hair on its head and a tuft of hair on its tail, although photographs of it fail to show any hair. Three examples were brought to Britain in 1833 and were displayed at the London Zoo as Egyptian Hairless Dogs; a specimen dating from 1903 is preserved at the Natural History Museum at Tring in Hertfordshire, England... It is estimated that approximately 1,700 of these dogs are in Argentina, predominantly in the Salta province in the north of the country. Worldwide recognized breeds at this time are the Chinese Crested Dog, the Xoloitzcuintle (Mexican Hairless Dog), the Peruvian Inca Orchid. According to BigThink, over 40% of the world's dog breeds come from the United Kingdom, France and Germany. It states: "Great Britain and France are the ground zero of dog fancying, with 57 registered breeds each. Germany is not far behind, with 47 breeds. These three countries alone represent more than 40% of all dog breeds recognized by the Fédération Cynologique Internationale." There are more than 400 extant modern dog breeds.

Miss Ellie (dog) 1993 – June 1, 2010), a blind American Chinese Crested hairless dog, was the 2009 winner in the pedigree section of the World's Ugliest Dog Contest. Miss Ellie died on June 1, 2010, at age 17. She appeared in Miss Ellie (c. 2010), a blind American Chinese Crested hairless dog, was the 2009 winner in the pedigree section of the World's Ugliest Dog Contest. She appeared in shows at the Comedy Barn in Pigeon Forge, Tennessee, and was featured on the Animal Planet cable show Dogs 101. Dawn Goehring rescued Miss Ellie at seven years old

Abyssinian sand terrier Africa to confirm that they no longer exist. It is unknown if any examples still exist. American Hairless Terrier Argentine Pila Chinese Crested Dog Peruvian Inca Orchid Xoloitzcuintle Morris, Desmond African hairless dogs, also known as Abyssinian sand terriers and African sand dogs among many other names, were hairless dogs from Africa

== History == Description ==

Hairless dog time are the Chinese Crested Dog, the Xoloitzcuintle (Mexican Hairless Dog), the Peruvian Inca Orchid. There are two known types of genetic hairlessness, a dominant and a recessive type. The Argentine Pila, the Hairless Khala from Bolivia A hairless dog is a dog with a genetic disposition for hairlessness and hair loss. The dominant type is caused by ectodermal dysplasia as a result of a mutation in the FOXI3 autosomal gene

== See also == Dogs with dominant genes for hairlessness can pass their attributes to their offspring in natural conditions; that is, not under the control of humans. Therefore, it is possible that, in some parts of the world, groups of hairless dogs came into existence without human intervention. Later in history, people developed these groups into recognized breeds. The World's Ugliest Dog Contest began in the 1970s as a way to generate revenue for the Old Adobe Association in Petaluma, and member Ross Smith is widely credited as the creator of the contest. After the association considered replacing their pet parade with a dog contest, Smith suggested an ugly dog contest, and the idea stuck. The Old Adobe Association nurtured the World's Ugliest Dog Contest...

Xoloitzcuintle It is found in standard, intermediate, and miniature sizes. In Nahuatl, from which its name originates, it is xōlōitzcuintli [ʃoːloːiʦˈkʷint͡ɬi] (singular) and xōlōitzcuintin [ʃoːloːiʦˈkʷintin] (plural). The Xolo has both hairless and coated types, with the latter fully furred. The name comes from the Aztec god of fire and lightning Xolotl that, according to ancient narratives, is its creator and itzcuintli [iʦˈkʷiːnt͡ɬi], meaning 'dog' in the Nahuatl language. The hairless variant is known as the perro pelón mexicano or Mexican hairless dog. Coated and hairless can be born in the same litter as a result of the same combination of genes. It is characterized by its wrinkles and dental abnormalities

Mexican Hairless Dog Peruvian Inca Orchid (Peruvian Hairless Dog) This type of genetic structure is... This "breed" of dog is known for being "semi-wild", meaning they tend to follow rather than live with the cattle breeders; though they occasionally serve as valuable companions on hunting trips. The many names of this "breed" include the words Egyptian, Abyssinian, and Zulu, which simply suggests that the genes for hairlessness have appeared independently in multiple areas of the continent as a cooling system in high heat.

List of dog breeds Tricolore Chihuahua Chilean Terrier Chinese Crested Dog Chinook Chippiparai Chongqing Chortai Chow Chow Chukotka sled dog Cimarrón Uruguayo Cirneco dell'Etna This list of dog breeds includes both extant and extinct dog breeds, varieties and types. A research article on dog genomics published in Science/AAAS defines modern dog breeds as "a recent invention defined by conformation to a physical ideal and purity of lineage"

Argentine Pila Hairlessness in this The Argentine Pila or Perro Pila Argentino is an Argentine breed of hairless dog. As the FOXI3 gene not only has an influence on hair follicles but the formation of teeth as well; the same mutation also causes dental differences. It was recognised by the Asociación Canina Argentina in 2007. It forms part of the large group of South American hairless breeds and types, but is distinct from other modern breeds such as the Chinese Crested, the Peruvian

Hairless and the Xoloitzcuintle. It is generally dark-skinned, or light-skinned with dark spots. the Chinese Crested, the Peruvian Hairless and the Xoloitzcuintle. It is generally dark-skinned, or light-skinned with dark spots. Hairlessness in this breed along with other South American breeds is caused by a dominant mutation in the FOXI3 gene, which results in a loss of hair as the mutation affects ectodermal development cccd9dd5f9

The Argentine Pila, the Hairless Khala from Bolivia, and the Ecuadorian Hairless Dog are not registered hairless dog breeds. cccd9dd5f9
