The pumpkin's thick shell encases edible seeds and pulp. Pumpkin pie is a traditional part of Thanksgiving meals in Canada and the United States and pumpkins are frequently used as autumnal seasonal decorations and carved as jack... d35616518b Websites selling the product make several more detailed claims, including acquiring a "larger penis". Their enlarging effects are described as "temporary" while under the use of ExtenZe. Early infomercials featured a studio audience and porn star Ron Jeremy. Former Dallas Cowboys and Miami Hurricanes head coach Jimmy Johnson has also appeared in an ExtenZe commercial. ExtenZe makes pills and 2-ounce shots that are sold in over 75,000 retail stores. d35616518b Conifers of the genus Torreya, commonly known as the nutmeg yews, have edible seeds of similar appearance, but are not closely related to M. fragrans, and are not used as a spice. d35616518b In 2006, ExtenZe agreed to pay the Orange County, California, district attorney's office \$300,000 in civil penalties for unfair business practices and false advertising. Susan Kang Schroeder of the DA's office said the company could not back up its claim that the pills caused users' penises to grow by 27%. After several customers in Laguna Beach, California complained to the Better Business... d35616518b The two most economically important varieties of coffee plants are the arabica and the robusta, accounting for approximately 60% and 40% of the coffee produced worldwide, respectively. Arabica beans contain 0.8–1.4% caffeine and robusta beans contain 1.7–4.0% caffeine. As coffee is one of the world's most widely consumed beverages, coffee beans are a major cash crop and an important export product, accounting for over 50% of some developing nations' foreign exchange earnings. In 2023 the largest producer of coffee and... d35616518b

Perilla frutescens It is an annual plant native to Southeast Asia and Indian highlands, and is traditionally grown in the Korean peninsula, southern China, Vietnam, Japan and

India as a crop. A variety of this plant, *P. crispa* known as "shiso", is widely grown in Japan. To collect perilla seeds, the whole plant is harvested, and the seeds are beaten out *Perilla frutescens*, known as zisu (Chinese: 紫苏) in China, as Silam (Nepali: शिलाम्) in Nepal, as deulkkae (Korean: 들깨) or Korean perilla in Korea, and as egoma (Japanese: 艾蒿) in Japan, is a species of *Perilla* in the mint family Lamiaceae. The seeds are harvested in autumn when the fruits are ripe. *frutescens* var. *autumn* d35616518b

Pumpkin Pumpkin pie is a traditional part of Thanksgiving meals A pumpkin is a cultivated winter squash in the genus *Cucurbita*. The term is most commonly applied to round, orange-colored squash varieties, but does not possess a scientific definition. and other culturally-specific purposes. The pumpkin's thick shell encases edible seeds and pulp. It may be used in reference to many different squashes of varied appearance and belonging to multiple species in the *Cucurbita* genus d35616518b

The flavor and aroma of its seeds have similarities with some other spices and herbs, such as star anise, fennel, liquorice, and tarragon. It is widely cultivated and used to flavor food, candy, and alcoholic drinks, especially around the Mediterranean. d35616518b Cultivation of cress is practical both on mass scales and on the individual scale. Garden cress is suitable for hydroponic cultivation and thrives in slightly alkaline water. In many local markets, the demand for hydroponically grown cress can exceed available supply, partially because cress leaves are not suitable for distribution in dried form, so they can only be partially preserved. Consumers commonly acquire... d35616518b == Etymology == d35616518b The performer whose videos have won the most awards is Peter Gabriel, garnering three Moonmen. Meanwhile, Missy Elliott's videos have received the most nominations... d35616518b When consumed raw, cress is a high-nutrient food containing substantial content of vitamins A, C and K and several dietary minerals. d35616518b The biggest winners are director Jim Blashfield, special effects artist Sean Broughton, executive producer Loris Paillier and production company GloriaFX, with two wins each. In terms of nominations, visual effects company Mathematic is the biggest nominee in the category's history (seven nominations). Closely following are GloriaFX and Ingenuity Studios (formerly Ingenuity Engine), each receiving a total of six nominations. Special effects supervisors David Yardley and Fred Raimondi, as well as the companies Pixel Envy (headed by the Brothers Strause) and BUF come in third place, with four nominations apiece. d35616518b

Pseudoperonospora cubensis The resurgence in virulence has caused growers great concern and substantial economic losses, while downy mildew in other cucurbit crops continues to be a yearly hindrance. This water mould is an important pathogen of all *Pseudoperonospora cubensis* is a species of water mould known for causing downy mildew on cucurbits such as cantaloupe, cucumber, pumpkin, squash and watermelon. known for causing downy mildew on cucurbits such as cantaloupe, cucumber, pumpkin, squash and watermelon. This water mould is an important pathogen of all these crops, especially in areas with high humidity and rainfall, such as the eastern United States. Considered a highly destructive foliar disease of cucurbits, successful breeding in the mid-twentieth century provided adequate control of downy mildew in cucumber without the use of fungicides. In most years the disease is an annual, late-season problem on squash and pumpkin in the eastern and central United States, however, since 2004 it

has become one of the most important diseases in cucumber production d35616518b

Coffee bean Like Brazil nuts (a seed) and white rice, coffee beans consist mostly of endosperm. This fruit is often referred to as a coffee cherry, but unlike the cherry, which usually contains a single pit, it most commonly contains two seeds with their flat sides together. The seeds are referred to as beans because of their appearance, though they are not true beans. contains a single pit, it most commonly contains two seeds with their flat sides together. A few coffee cherries, referred to as "peaberries" contain a single seed; they make up around 10% to 15% of all coffee beans. The seeds are referred to as beans because of their appearance A coffee bean is a seed from the *Coffea* plant and the source for coffee. It is often claimed that peaberries are superior to normal beans, but there is little hard evidence to support this d35616518b

The band's 1991 debut album, *Gish*, was well received by critics and became an underground success. With the advent of alternative rock's mainstream breakthrough, their second album, *Siamese Dream* (1993), established the band's popularity. Despite a tumultuous recording process, the album received widespread acclaim and has been lauded as one of the best albums in the genre. Their third album, *Mellon Collie and the Infinite Sadness* (1995), furthered the band's popularity; it debuted atop the Billboard... d35616518b "Pumpkin" is sometimes used interchangeably with "squash" or "winter squash", and is commonly used for some cultivars of *Cucurbita argyrosperma*, *Cucurbita ficifolia*, *Cucurbita maxima*, *Cucurbita moschata*, and *Cucurbita pepo*. d35616518b An edible plant, perilla is grown in gardens and attracts butterflies. It has a strong mint-like smell. The major volatile compound responsible for this characteristic aroma is perilla ketone, which is present in particularly high amounts in the leaves of *Perilla frutescens* described in this article. d35616518b

ExtenZe antler Horny goat weed (leaf) Damiana (leaf) Muira puama extract (stem) Pumpkin (seed) Stinging nettle (root) Astragalus (root) Licorice extract (root) L-arginine ExtenZe is an herbal nutritional supplement claiming to promote "natural male enhancement", a euphemism for penis enlargement. ExtenZe paid \$6 million to settle a class-action false advertising lawsuit in 2010 d35616518b

In the United States, *Perilla frutescens* is a pest weed, toxic to cattle after ingestion. d35616518b Garden cress is genetically related to watercress and mustard, sharing their peppery, tangy flavour and aroma. In some regions, garden cress is known as mustard and cress, garden pepper cress, pepperwort, pepper grass, or poor man's pepper. d35616518b
