

Barrage Des 3 Gorges

The remains of the Roman dam at Glanum were discovered in 1763 by Esprit Calvet. A recent study shows that the dam originally was composed of two curved parallel masonry walls, each around 1 metre (3.3 ft) thick and separated by a gap around 1.5 metres (4.9 ft) wide which was likely filled with earth and rubble. The cut stone blocks were held together by crampons and finished with Cordon joints designed to protect against water entry. At each end of the dam there was an abutment cut into the rock of the gorge. Overall the dam stood 6 metres (20 ft) high with a thickness... 1197b47863 The lake is divided between the cantons of Hesry (NW), Fagundez (SW), Le Courtois (SE) and Leventoux (NE). 1197b47863 It is to the east of Quebec Route 389. 1197b47863 == Geography == 1197b47863

Auris, Isère river forms the southern border of the commune as it flows west to the Barrage du Clapier - an artificial lake on the southern border of the commune - Auris (French pronunciation: [oʁis]) is a commune in the Isère department in the Auvergne-Rhône-Alpes region of south-eastern France 1197b47863

Argentat-sur-Dordogne Auvergne and the Quercy, on the Dordogne river after it has crossed deep gorges. The municipality was established on 1 January 2017 by merger of the former communes of Argentat (the seat) and Saint-Bazile-de-la-Roche. Argentat is located in the western part of the Xaintrie in the small Bas-Limousin Argentat-sur-Dordogne (French pronunciation: [aʁʒɑ̃ta syʁ dɔʁdɔʁ], literally Argentat on Dordogne) is a commune in the department of Corrèze, south-central France 1197b47863

Castellane Nice: Serre Éditeur. Castellane (French pronunciation: [kastɛlan]; Provençal Occitan: Castelana) is a commune in the Alpes-de-Haute-Provence department in the Provence-Alpes-Côte d'Azur region in Southeastern France. With a population of 1,472 (2023), it is France's second-least populated subprefecture, after Largentière in Ardèche. Castellane: à l’#039;aube des gorges du Verdon [Castellane: At the Dawn of the Gorges of Verdon] (in French). Robert Dichary (1994) 1197b47863

The northern tip is in the canton of Tilly. 1197b47863

List of lakes of France Génissiat at the barrage de Génissiat (for the part in Savoy) Lac de Gers Lac des Gorges du Fier at Montrottier Lac de la Griaz at the Houches Lac de Jotty at This list of lakes in France roughly distinguishes three categories: the mountain lakes, sorted first by massif, and then by départements; the lakes in plains, sorted by river basin; and the coastal lakes 1197b47863

The Cartier Railway runs along the southeast shore of the lake. 1197b47863 == Geography == 1197b47863

Neckar Rising in the Schwarzwald-Baar-Kreis near Schwenningen in the Schwenninger Moos conservation area, at a height of 706 m (2,316 ft) above sea level, it passes through Rottweil, Rottenburg am Neckar, Kilchberg, Tübingen, Wernau, Nürtingen, Plochingen, Esslingen, Stuttgart, Ludwigsburg, Marbach, Heilbronn and Heidelberg, before discharging on average 145 m3/s (5,100 cu ft/s) of water into the Rhine at Mannheim, at 95 m (312 ft) above sea level, making the Neckar its 4th largest tributary, and the 10th largest river in Germany. In 1962 the moveable barrage in Deizisau was constructed. Since 1968, the Neckar has been navigable for cargo ships via 27 locks for about 200 kilometres (120 mi) upstream from Mannheim to the river port of Plochingen, at the confluence with the Fils. In order to keep water level differences caused by the barrage, a ridge was constructed The Neckar (German pronunciation: [ˈnɛkaʁ]) is a 362-kilometre-long (225 mi) river in Germany, mainly flowing through the southwestern state of Baden-Württemberg, with a short section through Hesse.

descent. The Neckar is a major right tributary of the Rhine 1197b47863
