

# Fibonacci Number Sequence Formula

Lucas number closely related Fibonacci sequence. Individual numbers in the Lucas sequence are known as Lucas numbers. Lucas numbers and Fibonacci numbers form complementary

Fibonacci polynomials In mathematics, the Fibonacci polynomials are a polynomial sequence which can be considered as a generalization of the Fibonacci numbers. The polynomials

Jacobsthal number integer sequence named after the German mathematician Ernst Jacobsthal. Like the related Fibonacci numbers, they are a specific type of Lucas sequence  $U_n$

Pell number means of a recurrence relation similar to that for the Fibonacci numbers, and both sequences of numbers grow exponentially, proportionally to powers

Sequence subscript  $n$  refers to the  $n$ th element of the sequence; for example, the  $n$ th element of the Fibonacci sequence  $F_n$  is generally denoted as

Generalizations of Fibonacci numbers In mathematics, the Fibonacci numbers form a sequence defined recursively by:  $F_n = \begin{cases} 0 & n = 0 \\ 1 & n = 1 \\ F_{n-1} + F_{n-2} & n \geq 2 \end{cases}$

Random Fibonacci sequence In mathematics, the random Fibonacci sequence is a stochastic analogue of the Fibonacci sequence defined by the recurrence relation  $f_n = f_{n-1} \pm f_{n-2}$

Fibonacci sequence the Fibonacci sequence is a sequence in which each element is the sum of the two elements that precede it. Numbers that are part of the Fibonacci sequence

Padovan sequence the Padovan sequence and the Perrin sequence as the golden ratio does to the Fibonacci sequence.  $P(n)$  is the number of ways of writing  $n + 2$  as an ordered

Integer sequence (the Fibonacci sequence) is formed by starting with 0 and 1 and then. relationship between its terms. For example,

the sequence 0, 1, 1, 2, 3, 5, 8, 13, eafd45ce12
