Expression (mathematics) Symbols can denote numbers, variables, operations, and functions. Other symbols include punctuation marks and brackets, used for grouping where there is not a well-defined order of operations. Expressions can be In mathematics, an expression is an arrangement of symbols following the context-dependent, syntactic conventions of mathematical notation. evaluated to the Boolean values true or false. To evaluate an expression means to find a numerical value equivalent to the expression 65247cc224

For instance, text processing utilities use regular expressions to describe advanced search patterns, but NFAs are better suited for execution on a computer. Hence, this algorithm is of practical interest, since it can compile regular expressions into NFAs. From a theoretical point of view, this algorithm is a part of the proof that they both accept exactly the same languages, that is, the regular languages. 65247cc224 In the 2025–2026 academic year, SLU had an enrollment of 17,059 students, making SLU the fifth largest Catholic university in terms of enrollment in the United States. The student body included 8,502 undergraduate students and 6,702 graduate students that represent all 50 states and 96 countries. The university is classified among "R1: Doctoral Universities - Very High Spending and Doctorate Production". 65247cc224 Designed principally by Donato Bramante, Michelangelo, and Carlo Maderno, with piazza and fittings by Gian Lorenzo Bernini, Saint Peter's is one of the most renowned works of Italian Renaissance architecture and is the largest church in the world by interior measure. While it is neither the mother church of the Catholic Church nor the cathedral of the Diocese of Rome (these equivalent titles being held by the Archbasilica of Saint John Lateran in Rome), Saint Peter's is regarded as one of the holiest Catholic shrines. St Euphrasie's Church, Llanegwad A side chapel was added to the north in the 16th century, and some moderate restoration work was carried out in the 19th century. It contains a 12th-century font, a 13th-century carved stone depicting the crucifixion, and a memorial to one of the officers killed when the Royal Charter sank off Anglesey in 1859. This was at a time when a second altar was added to many churches to allow expressions of devotion to St Mary, and side chapels from the late 15th and early St Euphrasie's Church, Llanegwad is an isolated church near the village of Marian-glas, in Anglesey, north Wales. A church was supposedly founded here by St Euphrasie in about 605, although the earliest parts of the present structure are the nave, chancel and chancel arch, which date from the 12th century 65247cc224

Expressions are commonly distinguished from formulas: expressions usually denote mathematical objects, whereas formulas are statements about mathematical objects, such as an equality. This is analogous to natural language, where a noun phrase refers to an object, and a whole sentence refers to a fact. For example, 65247cc224
