International Journal of Injury Control and Safety Promotion 875. JCR: According to the Journal Citation Reports, the journal has a 2016 impact factor of 0. JCR: According to the Journal Citation Reports, the journal has a 2016 impact factor of 0. It is published by Taylor & Francis and is an official journal of the European Association for Injury Prevention and Safety Promotion (EuroSafe), formerly the European Consumer Safety Association (ECOSA). The journal was established in 1994 The International Journal of Injury Control and Safety Promotion is a peer-reviewed scientific journal covering research in ergonomics, product safety, and the prevention and care of injuries. 875. Association (ECOSA) 5792e19f7b

To be included in the ESCI, journals must be: 5792e19f7b == Abstracting and indexing == 5792e19f7b == Persons == 5792e19f7b This journal evaluation metric was launched in December 2016 as an alternative to the Journal Citation Reports (JCR) impact factor (IF), calculated by Clarivate. CiteScore is based on the citations collected for articles published in the preceding four years, instead of two or five in the JCR IF. This enhanced methodology was introduced with the release of CiteScore 2019 in June 2020. At launch, CiteScore's neutrality was questioned by bibliometrics experts like Carl Bergstrom, who found it appeared to favour Elsevier's titles over Nature's. 5792e19f7b == Basic journal information == 5792e19f7b The impact factor was devised by Eugene Garfield, the founder of the Institute for Scientific Information (ISI) in Philadelphia. Impact factors began to be

calculated yearly starting from 1975 for journals listed in the Journal Citation Reports (JCR). ISI was acquired by Thomson Scientific & Healthcare in 1992, and became known as Thomson ISI. In 2018, Thomson-Reuters spun off and sold ISI to Onex Corporation and Baring Private Equity Asia. They founded a new corporation, Clarivate, which continued publishing the JCR. The ESCI is accessible through the Web of Science, together with other Clarivate indexes. As of June 2021, all journals indexed in ESCI are also included in the Journal Citation Reports. While these journals still did not receive an impact factor until the next year, they did contribute citations to the calculation of other journals' impact factors. In July 2022, Clarivate announced that journals in the ESCI obtain an impact factor effective from JCR Year 2022 first released in June 2023.

Journal Citation Reports JCR was originally published as a part of the Science Citation Index. Into the 21st century, the JCR, as a distinct service, is based on citations compiled from the Science Citation Index Expanded and the Social Sciences Citation Index. It has been integrated with the Web of Science and is accessed from the Web of Science Journal Citation Reports (JCR) is an annual publication by Clarivate. It provides information about academic journals in the natural and social sciences, including impact factors. It has been integrated with the Web of Science and is accessed from the Web of Science Core Collection. As of the 2023 edition, journals from the Arts and Humanities Citation Index and the Emerging Sources Citation Index have also been included. Journal Citation Reports (JCR) is an annual publication by Clarivate

Emerging Sources Citation Index To be included in the ESCI, journals must be: Peer reviewed Follow ethical The Emerging Sources Citation Index (ESCI) is a citation index produced since 2015 by Thomson Reuters and now by Clarivate. According to the publisher, the index includes "peer-reviewed publications of regional importance and in emerging scientific fields". obtain an impact factor effective from JCR Year 2022 first released in June 2023

Impact factor Impact factor is a scientometric index calculated by Clarivate's Web of Science. began to be calculated yearly starting from 1975 for journals listed in the Journal Citation Reports (JCR). Journals with higher impact-factor values are considered more prestigious or important within their field. ISI was acquired by Thomson Scientific & Healthcare The impact factor (IF) or journal impact factor (JIF) of an academic journal is a type of journal ranking. While frequently used by universities and funding bodies to decide on promotion and research proposals, it has been criticised for distorting good scientific practices. The impact factor of a journal reflects the yearly mean number of article citations published in the last two years 5792e19f7b

== See also == 5792e19f7b In any given year, the CiteScore of a journal is the number of citations, received in that year and in previous three years, for documents published in the journal during the total period (four years), divided by the total number of published documents (articles, reviews, conference papers, book chapters... 5792e19f7b
