Double florin Its obverse, designed by Joseph Boehm and engraved by Leonard Charles Wyon, depicts Queen Victoria, whilst the reverse, featuring national symbols of the United Kingdom, was designed by Wyon based on the coinage of Charles II. The Times, discussing the new double florin, could see no reason why the coin was necessary, describing it as "very heavy, very large, and The double florin, or four-shilling piece, was a British coin produced by the Royal Mint between 1887 and 1890. found useful. The discovery of this process was partially responsible for the end of the U.S. government's hurricane modification experiment Project Stormfury. This project set out to seed clouds outside the eyewall, apparently causing a new eyewall to form and weakening the storm. When it was discovered that this was a natural process due to hurricane dynamics, the project was quickly abandoned...

Eyewall replacement cycle WISHE has been proposed as a method In meteorology, an eyewall replacement cycle, also called a concentric eyewall cycle, is a process whereby some of the outer rainbands of a tropical cyclone with an eye strengthen and organize into a ring of thunderstorms—a new, outer eyewall—that slowly moves inward and robs the original, inner eyewall of its needed moisture and angular momentum. stronger ocean-to-atmosphere heat flux results in a stronger atmospheric circulation, which results in a strong heat flux. Since the strongest winds are in a tropical cyclone's eyewall, the storm usually weakens during this phase, as the inner wall is "choked" by the outer wall. Eventually the outer eyewall replaces the inner one completely, and the storm may re-intensify

The double florin was introduced as part of a coinage redesign that took place in 1887, the year of Queen Victoria's Golden Jubilee. One purpose of the redesign was to replace portraits of the queen which had changed little since her youth, and which no longer resembled the monarch, who was nearing her seventieth birthday. Mint officials and politicians also sought to reduce dependence on the half sovereign, a gold coin worth ten shillings which was expensive to strike, by issuing the double florin (four shillings) and reintroducing the crown (five shillings) coin. They may also have intended a further decimalisation of the coinage after the introduction of the florin (two shillings, or one-tenth of a pound) in 1849.

Several decades after its 1829 founding, The Inquirer began emerging as one of the nation's major newspapers during the American Civil War. Its circulation dropped after the Civil War's conclusion, but it rose again by the end of the 19th century. Originally supportive of the Democratic Party, The Inquirer's political orientation eventually shifted toward the Whig Party and then the Republican Party before stating, in the mid-20th century, that it was politically independent...
