

Peroneal Nerve Fibular Nerve

Deep fibular nerve The deep fibular nerve (also known as deep peroneal nerve) begins at the bifurcation of the common fibular nerve between the fibula and upper part of tibia

Fibular veins The fibular veins are deep. anatomy, the fibular veins (also known as peroneal veins) are accompanying veins (venae comitantes) of the fibular artery

Peroneal nerve paralysis Peroneal nerve paralysis is a paralysis on the common fibular nerve that affects the patient's ability to lift the foot at the ankle. It is also known as foot drop

Sural communicating branch of common peroneal nerve sural communicating nerve (SCN) (peroneal communicating branch of the common fibular nerve) is a separate and independent nerve from both the medial and lateral sural cutaneous nerves

Superficial fibular nerve The superficial fibular nerve (also known as superficial peroneal nerve) is a mixed (motor and sensory) nerve that provides motor innervation to the fibularis

Fibular artery It arises from the tibial-fibular trunk. the fibular artery, also known as the peroneal artery, supplies blood to the lateral compartment of the leg

Lateral sural cutaneous nerve One branch, the sural communicating nerve or colloquially. from the common fibular nerve(L4-S2) and is the terminal branch of the common fibular nerve

Cutaneous innervation of the lower limbs Saphenous nerve (pink), a branch of the femoral nerve. Superficial. Common fibular nerve (blue) labeled as "peroneal nerve". Also Lateral sural cutaneous nerve

Common fibular nerve The common fibular nerve (also known as the common peroneal nerve, external popliteal nerve, or lateral popliteal nerve) is a nerve in the lower leg that

Sciatic nerve common peroneal nerve), which travels down the anterior and lateral compartments of the leg into the foot The sciatic nerve is the largest nerve in the
