Abdominal examination An abdominal examination may be performed because the physician suspects a disease of the organs inside the abdominal cavity (including the liver, spleen, large or small intestines), or simply as a part of a complete physical examination for other conditions. Auscultation (listening) of the abdomen with a stethoscope. Palpation of the patient's abdomen. The abdominal examination is conventionally split into four different stages: first, inspection of the patient and the visible characteristics of their abdomen. Depending on the need to test for specific diseases such as ascites, special tests may be performed as a part of the physical examination. Finally, percussion (tapping) of the patient's abdomen and abdominal organs. In a complete physical examination, the abdominal exam classically follows the respiratory examination and cardiovascular examination. A top is usually a person who engages in the penetrative role during sexual activity; for men who have sex with men (MSM), this often involves penetration using the penis during anal and oral sex. Top is also used as a verb meaning "to penetrate another." Top may also describe a broader personal identity involving the display of dominance and authority in a romantic or sexual relationship; however, this stipulation is not a requisite element of being a top. 10d26c5bac == Synopsis == 10d26c5bac == Feeding strategies ==
